#### IV. Revisions to the TSCA Section 4(e) Priority Testing List

##### A. Chemicals Added to the Priority Testing List: Vanadium Compounds

1. *Recommendation.* Forty-three vanadium compounds are being added to the *Priority Testing List* to obtain

importation, production, use, exposure, and health effects information to meet U.S. Government data needs (Table 4 of this unit). These compounds were identified by searching reference sources and chemical databases maintained by agencies in the United States and Canada. The ITC believes the

list of vanadium compounds in Table 4 of this unit includes those most likely to be in current use. Toxicological effects of vanadium compounds were recently summarized by the International Program on Chemical Safety under the auspices of the World Health Organization (WHO) (Ref. 13).
