On January 3, 2003, a notice
proposing to amend part 71 of the
Federal Aviation Regulations (14 CFR
part 71) by establishing Class E airspace
extending upward from 700 feet above
the surface within a 6-mile radius of
Ridgely Airpark, Ridgely, MD was
published in the *Federal Register* (68
FR 328-329). Interested parties were
invited to participate in this rulemaking
proceeding by submitting written
comments on the proposal to the FAA
on or before February 3, 2003. No
comments to the proposal were
received. The rule is adopted as
proposed.

The coordinates for this airspace
docket are based on North American
Datum 83. Class E airspace area
designations for airspace extending
upward from the surface of the earth are
published in paragraph 6005 of FAA
Order 7400.9K, dated August 30, 2002,

and effective September 16, 2002, which
is incorporated by reference in 14 CFR
71.1. The Class E airspace designation
listed in this document will be
published in the Order.

The Rule

This amendment to part 71 of the
Federal Aviation Regulations (14 CFR
part 71) provides controlled Class E
airspace extending upward from 700
feet above the surface for aircraft
conducting IFR operations within a 6-
mile radius of Ridgely Airpark, Ridgely,
MD.

The FAA has determined that this
regulation only involves an established
body of technical regulations for which
frequent and routine amendments are
necessary to keep them operationally
current. Therefore, this regulation: (1) Is
not a “significant regulatory action”
under Executive Order 12866; (2) is not
a “significant rule” under DOT
Regulatory Policies and Procedures (44
FR 11034; February 26, 1979); and (3)
does not warrant preparation of a
Regulatory Evaluation as the anticipated
impact is so minimal. Since this is a
routine matter that will only affect air
traffic procedures and air navigation, it
is certified that this rule will not have
significant economic impact on a
substantial number of small entities
under the criteria of the Regulatory
Flexibility Act.
