

business information under § 710.58 must indicate, for each reportable chemical substance at each site, whether the total volume range (in pounds) which corresponds with the specific volume figure reported in response to paragraph (c)(3)(iv) of this section is also confidential. Volume ranges are listed in the following table:

VOLUME RANGES

From	To
25,000 lbs. ....	300,000 lbs.
300,000 lbs. ....	1,000,000 lbs.
1,000,000 lbs. ....	10,000,000 lbs.
10,000,000 lbs. ....	50,000,000 lbs.
50,000,000 lbs. ....	100,000,000 lbs.
100,000,000 lbs. ....	500,000,000 lbs.
500,000,000 lbs. ....	1,000,000,000 lbs.
Greater than 1,000,000,000 lbs..	

(vi) The total number of workers reasonably likely to be exposed to each reportable chemical substance at each site. For each reportable substance at each site, the submitter must select from among the ranges of workers listed in the following table and report the corresponding code (i.e., W1 through W8):

#### CODES FOR REPORTING NUMBER OF WORKERS REASONABLY LIKELY TO BE EXPOSED

Codes	Range
W1 .....	Less than 10 workers
W2 .....	At least 10 but less than 25 workers
W3 .....	At least 25 but less than 50 workers
W4 .....	At least 50 but less than 100 workers
W5 .....	At least 100 but less than 500 workers
W6 .....	At least 500 but less than 1,000 workers
W7 .....	At least 1,000 but less than 10,000 workers
W8 .....	At least 10,000 workers

(vii) The maximum concentration, measured by percentage of weight, of each reportable chemical substance at the time it is sent off-site from each site. If the chemical is site-limited, you must report the maximum concentration, measured by percentage of weight, of the reportable chemical substance at the time it is reacted on-site to produce a different chemical substance. This information must be reported regardless of the physical form(s) in which the substance is sent off-site/reacted on-site. For each substance at each site, select the maximum concentration of the substance from among the ranges listed

in the following table and report the corresponding code (i.e., M1 through M5):

#### CODES FOR REPORTING MAXIMUM CONCENTRATION OF CHEMICAL SUBSTANCE

Codes	Concentration Range (% weight)
M1 .....	Less than 1% by weight
M2 .....	From 1 to 30% by weight
M3 .....	From 31 to 60% by weight
M4 .....	From 61 to 90% by weight
M5 .....	Greater than 90% by weight

(viii) The physical form(s) of the reportable chemical substance as it is sent off-site from each site. If the chemical is site-limited, you must report the physical form(s) of the reportable chemical substance at the time it is reacted on-site to produce a different chemical substance. For each substance at each site, the submitter must report as many physical forms as apply from among the physical forms listed below:

- (A) Dry powder.
- (B) Pellets or large crystals.
- (C) Water- or solvent-wet solid.
- (D) Other solid.
- (E) Gas or vapor.
- (F) Liquid.

(ix) Submitters must report the percentage, rounded off to the closest 10%, of total production volume of the reportable chemical substance, reported in response to paragraph (c)(3)(iv) of this section, that is associated with each physical form reported under paragraph (c)(3)(viii) of this section. The sum of the percentages reported must not add up to more than 100%.

(4) Specific information for chemical substances manufactured in amounts of 300,000 lbs. or more. In addition to the information required under paragraphs (c)(1), (c)(2), and (c)(3) of this section, the following information must be reported for each reportable chemical substance manufactured (including imported) in an amount of 300,000 lbs. (136,077 kg) or more at any one site during calendar year 2005 or during the calendar year at 4-year intervals thereafter. Persons subject to paragraph (c)(4) of this section must report the information described in paragraphs (c)(4)(i) and (c)(4)(ii) of this section for each reportable chemical substance at sites under their control and at sites that receive a reportable chemical substance from the submitter directly or indirectly (including through a broker/distributor, from a customer of the submitter, etc.). Information reported in response to this paragraph must be reported only to the extent that it is readily obtainable by the

submitter. If information responsive to a given data requirement under this paragraph, including information in the form of an estimate, is not readily obtainable, the submitter is not required to respond to the requirement.

(i) Industrial processing and use information.

(A) A designation indicating the type of industrial processing or use operation(s) at each site that receives a reportable substance from the submitter site directly or indirectly (whether the recipient site(s) are controlled by the submitter site or not). For each chemical substance, report the letters which correspond to the appropriate processing or use operation(s). A particular designation may need to be reported more than once, to the extent that a submitter reports more than one NAICS code (under paragraph (c)(4)(i)(B) of this section) that applies to a given designation under this paragraph.

Designation	Operation
PC .....	Processing as a reactant
PF .....	Processing - incorporation into formulation, mixture or reaction product
PA .....	Processing - incorporation into article
PK .....	Processing - repackaging
U .....	Use - non-incorporative activities

(B) The five-digit North American Industrial Classification System (NAICS) codes which best describe the industrial activities associated with each industrial processing or use operation reported under paragraph (c)(4)(i)(A) of this section. Information about how to find these codes is provided in the instruction booklet available from EPA at the address set forth in § 710.59. A particular NAICS code may need to be reported more than once, to the extent that a submitter reports more than one industrial function code (under paragraph (c)(4)(i)(C) of this section) that applies to a given NAICS code under this paragraph.

(C) For each NAICS code reported under paragraph (c)(4)(i)(B) of this section, code(s) from the following list must be selected to designate the industrial function category(ies) that best represents the specific manner in which the chemical substance is used. A particular industrial function category may need to be reported more than once, to the extent that a submitter reports more than one industrial processing or use operation/NAICS code
