

combination (under paragraphs (c)(4)(i)(A) and (c)(4)(i)(B) of this section) that applies to a given industrial function category under this paragraph. If more than 10 unique combinations of industrial processing or use operations/NAICS codes/industrial function categories apply to a chemical substance, submitters need only report the 10 unique combinations for the chemical substance that cumulatively represent the largest percentage of the submitter's production volume for that chemical, measured by weight.

#### CODES FOR REPORTING INDUSTRIAL FUNCTION CATEGORIES

Codes	Category
U01 .....	Adsorbents and absorbents
U02 .....	Adhesives and binding agents
U03 .....	Aerosol propellants
U04 .....	Agricultural chemicals (non-pesticidal)
U05 .....	Anti-adhesive agents
U06 .....	Bleaching agents
U07 .....	Coloring agents, dyes
U08 .....	Coloring agents, pigments
U09 .....	Corrosion inhibitors and anti-scaling agents
U10 .....	Fillers
U11 .....	Fixing agents
U12 .....	Flame retardants
U13 .....	Flotation agents
U14 .....	Fuels
U15 .....	Functional fluids
U16 .....	Intermediates
U17 .....	Lubricants
U18 .....	Odor agents
U19 .....	Oxidizing agents
U20 .....	pH-regulating agents
U21 .....	Photosensitive chemicals
U22 .....	Plating agents and metal surface treating agents
U23 .....	Processing aid, not otherwise listed
U24 .....	Process regulators, used in vulcanization or polymerization processes
U25 .....	Process regulators, other than polymerization or vulcanization processes
U26 .....	Reducing agents
U27 .....	Solvents (for cleaning or degreasing)
U28 .....	Solvents (which become part of product formulation or mixture)
U29 .....	Solvents (for chemical manufacture and processing and are not part of product at greater than one percent by weight)
U30 .....	Stabilizers
U31 .....	Surface active agents
U32 .....	Viscosity adjusters
U33 .....	Other

(D) The estimated percentage, rounded off to the closest 10%, of total production volume of the reportable chemical substance associated with each combination of industrial

processing or use operation, NAICS code and industrial function category. Where a particular combination of industrial processing or use operation, NAICS code and industrial function category accounts for 5% or less of the submitter's site's total production volume of a reportable chemical substance, the percentage must not be rounded off to zero % if the production volume attributable to that industrial processing or use operation, NAICS code and industrial function category combination is 300,000 lbs. (136,077 kg) or more during the reporting year. Instead, in such a case, submitters must report the percentage, rounded off to the closest 1%, of the submitter's site's total production volume of the reportable chemical substance associated with the particular combination of industrial processing or use operation, NAICS code and industrial function category.

(E) For each combination of industrial processing or use operation, NAICS code and industrial function category, the submitter must estimate the number of sites at which each reportable chemical substance is processed or used. For each combination associated with each substance, the submitter must select from among the ranges of sites listed in the following table and report the corresponding code (i.e., S1 through S7):

#### CODES FOR REPORTING NUMBERS OF SITES

Codes	Range
S1 .....	Less than 10 sites
S2 .....	From 10 to 25 sites
S3 .....	From 25 to 100 sites
S4 .....	From 100 to 250 sites
S5 .....	From 250 to 1,000 sites
S6 .....	From 1,000 to 10,000 sites
S7 .....	More than 10,000 sites

(F) For each combination of industrial processing or use operation, NAICS code and industrial function category, the submitter must estimate the number of workers reasonably likely to be exposed to each reportable chemical substance. For each combination associated with each substance, the submitter must select from among the worker ranges listed in paragraph (c)(3)(vi) of this section and report the corresponding code (i.e., W1 through W8).

(ii) *Commercial and consumer use information.*

(A) Using the codes listed in this paragraph, submitters must designate the commercial and consumer product category or categories that best describe the commercial and consumer products in which each reportable chemical

substance is used (whether the recipient site(s) are controlled by the submitter site or not). If more than 10 codes apply to a chemical substance, submitters need only report the 10 codes for the chemical substance that cumulatively represent the largest percentage of the submitter's production volume for that chemical, measured by weight:

#### CODES FOR REPORTING COMMERCIAL AND CONSUMER PRODUCT CATEGORIES

Codes	Category
C01 .....	Artists' supplies
C02 .....	Adhesives and sealants
C03 .....	Automotive care products
C04 .....	Electrical and electronic products
C05 .....	Glass and ceramic products
C06 .....	Fabrics, textiles and apparel
C07 .....	Lawn and garden products (non-pesticidal)
C08 .....	Leather products
C09 .....	Lubricants, greases and fuel additives
C10 .....	Metal products
C11 .....	Paper products
C12 .....	Paints and coatings
C13 .....	Photographic chemicals
C14 .....	Polishes and sanitation goods
C15 .....	Rubber and plastic products
C16 .....	Soaps and detergents
C17 .....	Transportation products
C18 .....	Wood and wood furniture
C19 .....	Other

(B) Submitters must determine, within each commercial and consumer product category reported under paragraph (c)(4)(ii)(A) of this section, whether any amount of each reportable chemical substance manufactured (including imported) by the submitter is present in (for example, a plasticizer chemical used to make pacifiers) or on (for example, as a component in the paint on a toy) any consumer products intended for use by children up to the age of 14, regardless of the concentration of the substance remaining in or on the product. Submitters must select from the following options: the chemical substance is used in or on any consumer products intended for use by children, the chemical substance is not used in or on any consumer products intended for use by children, or information as to whether the chemical substance is used in or on any consumer products intended for use by children is not readily obtainable.

(C) The estimated percentage, rounded off to the closest 10%, of the submitter's site's total production volume of the reportable chemical substance associated with each commercial and consumer product
