

interested in commenting on this action should do so at this time.

DATES: Written comments must be received on or before March 31, 2003.

ADDRESSES: All comments should be addressed to: Raymond Werner, Chief, Air Programs Branch, Environmental Protection Agency, Region II Office, 290 Broadway, New York, New York 10007-1866.

A copy of the Virgin Islands submittal is available for inspection at the Region 2 Office in New York City. Those interested in inspecting the submittal must arrange an appointment in advance by calling (212) 637-4249. Alternatively, appointments may be arranged via e-mail by sending a message to Demian P. Ellis at Ellis.Demian@epa.gov. The office address is 290 Broadway, Air Programs Branch, 25th Floor, New York, New York 10007-1866.

A copy of the Virgin Islands submittal is also available for inspection at the following location: Virgin Islands Department of Planning and Natural Resources, Division of Environmental Protection, Cyril E. King Airport, Terminal Building, 2nd Floor, St. Thomas, USVI, 00802.

FOR FURTHER INFORMATION CONTACT: Demian P. Ellis, Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10007-1866, Telephone, (212) 637-4249.

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule which is located in the Rules Section of this **Federal Register**.

The Environmental Protection Agency (EPA) is proposing to approve a negative declaration submitted by the Government of the United States Virgin Islands (Virgin Islands) on October 25, 2002. The negative declaration officially certifies to EPA that, to the best of the Virgin Islands' knowledge, there are no commercial and industrial solid waste incineration (CISWI) units in operation within the Territory. This negative declaration concerns existing CISWI units throughout the Territory of the U.S. Virgin Islands. The negative declaration satisfies the Federal Emission Guidelines (EG) requirements of EPA's promulgated regulation entitled "Emission Guidelines for Existing Commercial and Industrial Solid Waste Incineration Units" (65 FR 75338, December 1, 2000).

Dated: February 11, 2003.

Jane M. Kenny,

Regional Administrator, Region 2.

50 CFR Part 600

[I.D. 021303A]

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits (EFPs)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of a proposal for EFPs to conduct experimental fishing; request for comments.

SUMMARY: The Administrator, Northeast Region, NMFS (Regional Administrator) has made a preliminary determination that the subject EFP application contains all of the required information and warrants further consideration. The Regional Administrator has also made a preliminary determination that the activities authorized under the EFP are consistent with the goals and objectives of the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan (FMP); the Atlantic Mackerel, Squid, and Butterfish FMP; and the Bluefish FMP. However, further review and consultation may be necessary before a final determination is made to issue an EFP. Therefore, NMFS announces that the Regional Administrator proposes to issue EFPs that would allow up to two vessels to conduct a supplemental finfish survey, and up to 15 additional vessels to conduct fishing operations otherwise restricted by the regulations governing the fisheries of the Northeastern United States. In order to fund the survey, the 15 additional vessels would be fishing for specific amounts of named species under the Research Set-Aside (RSA) Program. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments on this document must be received on or before 5 p.m. EST March 14, 2003.

ADDRESSES: Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on NFI Supplemental Survey EFP Proposal."

Comments may also be sent via facsimile (fax) to (978) 281-9135.

FOR FURTHER INFORMATION CONTACT: Paul Perra, Fishery Policy Analyst, 978-281-9153.

SUPPLEMENTARY INFORMATION: The application process for an EFP was completed by the National Fisheries Institute (NFI) on January 30, 2003. The experiment, coordinated by NFI in cooperation with Rutgers University and NMFS' Northeast Fisheries Science Center, requested EFPs for up to two vessels to conduct a supplemental finfish survey targeting Mid-Atlantic migratory species, and for up to 15 additional vessels to harvest RSA allocations. The two vessels participating in the research project, and up to 15 additional vessels, would make additional compensation fishing trips, during closed seasons, to land up to the total RSA quota allocation of 67,163 lb (30,465 kg) of summer flounder, 21,325 lb (9,673 kg) of scup, 21,338 lb (9,679 kg) of black sea bass, 140,543 lb (63,749 kg) of *Loligo* squid, 194,413 lb (88,185 kg) of *Illex* squid, 702,712 lb (318,745 kg) of Atlantic mackerel, and 141,900 lb (64,365 kg) of bluefish. However, no fish caught during these compensation fishing trips smaller than the legal minimum size could be sold, traded, bartered, or processed for sale. Landings from such trips would be sold to generate funds that would defray the costs associated with the research projects.

Under the research project, the research vessels would make two trips of several days each, along two transects, and conduct 10 research tows during each trip. One transect would be east of Hudson Canyon and one south of Baltimore Canyon. Sampling would be conducted in March and May of 2003 along each transect at 50 fm (91 m), 60 fm (110 m), 80 fm (146 m), 125 fm (229 m), 150 fm (247 m), 200 fm (366 m), and 225 fm (411 m), with two additional trawl sites added along each of the transects based on the catches of the target species. Primary target species would be summer flounder, scup, black sea bass, monkfish, and spiny dogfish; secondary target species would be skates, yellowtail flounder, winter flounder, lobster, and *Loligo* squid. One tow would be conducted at each station over a fixed distance of 2 nautical miles, with tow speeds of 3 to 3.2 knots. A four-seam box net would be used with a 2.4-inch (6-cm) mesh codend. Careful records would be kept of all gear descriptions so that subsequent surveys can use consistent gear. Scientific research personnel would be on board
