

Figure 1
Summary of Changes from Proposed Rule to Final Rule

- Final Kauai and Niihau Critical Habitat Unit
- Proposed Kauai and Niihau Critical Habitat Unit
- Major Roads
- Coastline
- Elevation (1000-ft. contours)

Kauai A

This unit was proposed as critical habitat for two multi-island species: *Centaurium sebaeoides* and *Ischaemum byrone*. We excluded the proposed critical habitat for *Centaurium sebaeoides*. This area is not essential for the conservation of *Centaurium sebaeoides* because it lacks one or more of the primary constituent elements, has a lower proportion of associated native species than other areas we consider to be essential to the conservation of *Centaurium sebaeoides*, is not currently managed for the conservation of this species, and there are at least 10 other locations in its historical range on Kauai and other islands which provide habitat

for this species and which are either designated as critical habitat in this rule or have been proposed for designation in other rules.

Modifications were made to this unit to exclude areas that do not contain the primary constituent elements for *Ischaemum byrone*. The area designated as critical habitat for this species provides habitat within its historical range for two populations.

This modification resulted in the reduction from 15 ha (38 ac) to 13 ha (32 ac). This unit was renamed Kauai 1—*Ischaemum byrone*—a, Kauai 2—*Ischaemum byrone*—b, and Kauai 3—*Ischaemum byrone*—c.

Kauai B

This unit was proposed as critical habitat for two species: *Hibiscus clayi* and *Munroidendron racemosum*. Modifications were made to this unit to exclude areas that do not contain the primary constituent elements essential to the conservation of *Hibiscus clayi* and *Munroidendron racemosum*. The area designated as critical habitat for these two Kauai endemic species provides habitat within their historical ranges for one population of each species.

This modification resulted in the reduction from 271 ha (669 ac) to 60 ha (148 ac). This unit was renamed Kauai 5—*Hibiscus clayi*—f and Kauai 5—*Munroidendron racemosum*—a.
