

B. Limited Entry Fishery

(1) *General.* Most species taken in limited entry fisheries will be managed with cumulative trip limits (see paragraph A.(1)(d).), size limits (see paragraph A.(6)), seasons (see paragraph A.(7)), and areas that are closed to specific gear types. The trawl fishery has gear requirements and trip limits that differ by the type of trawl gear on board (see paragraph A.(14)). Cowcod retention is prohibited in all fisheries and groundfish vessels operating south of Point Conception must adhere to CCA restrictions (see paragraph A.(20)).

Yelloweye rockfish retention is prohibited in the limited entry fixed gear fisheries. Most of the management measures for the limited entry fishery are listed above and in the following tables: Table 3 (North), Table 3 (South), Table 4 (North), and Table 4 (South). A header in Table 3 (North), Table 3 (South), Table 4 (North), and Table 5 (South) approximates the Rockfish Conservation Area (i.e., closed area) for vessels participating in the limited entry fishery. [Note: Between a line drawn due south from Point Fermin (33° 42' 30" N. lat.; 118° 17' 30" W. long.) and a line drawn due west from the

Newport, South Jetty (33° 35' 37" N. lat.; 117° 52' 50" W. long.) vessels fishing with hook-and-line- and/or trap (or pot) gear may operate from shore to a boundary line approximating 50 fm (91 m).]

Management measures may be changed during the year by announcement in the **Federal Register**. However, the management regimes for several fisheries (nontrawl sablefish, Pacific whiting, and black rockfish) do not neatly fit into these tables and are addressed immediately following Table 3 (North), Table 3 (South), Table 4 (North), and Table 4 (South).
