

intended to restate its commitment to cost share with Task Force I or to make an offer to cost share with Task Force II. In any case, Prochimie's letter at most shows that Prochimie made an offer to cost share, which was an option it emphasized that it had not selected. Prochimie did not provide any evidence that it had selected the option of offer to pay or that any such offer had been accepted. In order to support the option Prochimie selected to address the data requirements, it must provide evidence that any such offer had been accepted. Prochimie did not do that. Although Prochimie paid Task Force II for the use of several specific studies which are not involved in this Notice, those payments do not provide any evidence that a cost share agreement has been reached with respect to any other studies required by the 1991 DCI for nonresidential turf use that Task Force II submitted or has committed to submit. In fact, Mr. Rockwell, the chairman of Task Force II, stated in an affidavit dated May 2, 2000, that "No written offer-to-pay or any offer to jointly develop any data as required by and identified in the 1991 DCI has ever been received by Thiram Task Force II... from Prochimie." Since Task Force II does not believe that it has ever received an offer to cost share from Prochimie, it is unlikely that a cost share agreement has been reached between Prochimie and Task Force II. Without adequate proof of such an agreement, Prochimie may not claim an ownership interest in Task Force II's data for which Prochimie has not paid and hence may not claim that such data satisfies Prochimie's obligations. Consequently, the Agency considers that Prochimie is in noncompliance with certain data requirements for nonresidential turf use imposed by the 1991 DCI irrespective of Task Force II's actions to address those data requirements. Those data requirements are identified in Appendix II to this Notice and are as follows: EPA Guideline Nos. 71-4(b), 83-4, 85-1, and 122-2.

Moreover, prior to its dissolution, Task Force I failed to satisfy certain 1984 DCI data requirements for nonresidential turf use that were also imposed by the 1991 DCI. Because Prochimie was a member of Task Force I and has not independently submitted data or otherwise addressed these requirements, Prochimie is in noncompliance with these requirements. These data requirements are identified in Appendix II to this Notice and are as follows: EPA Guideline Nos. 161-1, 161-2, 162-1, 163-1, and 164-1.

In a letter dated December 21, 1998, EPA informed Prochimie that the data required under the 1991 DCI were long overdue and that Prochimie had satisfied only those data requirements that had been satisfied by Task Force I prior to its dissolution. In a letter dated January 12, 1999, Prochimie informed EPA that "Prochimie cost shared/co-owned several studies submitted by Task Force II." However, Prochimie did not provide the evidence required by the 1991 DCI that Prochimie and Task Force II have agreed to cost share in the development of any other data required by the 1991 DCI for nonresidential turf use. Prochimie's letter also restated Prochimie's commitment to satisfy certain data requirements that neither

Task Forces committed to fulfill. However, Prochimie did not submit any studies or proof required by the 1991 DCI of a cost share agreement with any party obligated to satisfy these data requirements.

In a letter dated June 29, 1999, Prochimie requested data waivers (or determination of nonapplicability or no need for additional data) for, among others, the following data requirements: Guideline Nos. 82-2, 83-4, 122-2, 161-1, 161-2, 163-1, and 164-1, and 165-4. After careful consideration of Prochimie's requests, EPA denied the request for waiver of the above mentioned data requirements in letters dated May 21, 2001 and August 31, 2001.

In a letter dated August 31, 2001, EPA informed Prochimie of its failure to demonstrate that it had taken appropriate steps to secure data required by the 1991 DCI. In an attachment to the letter, EPA identified all of the data requirements for nonresidential turf use under the 1991 DCI and the names of the parties who submitted studies for those requirements. As shown in that attachment, UCB Chemicals Corporation, Inc. ("UCB"), not Task Force I or II, satisfied a number of data requirements under the 1991 DCI for nonresidential turf use. The letter notified Prochimie of the Agency's intent to issue a Notice of Intent to Suspend Prochimie's technical thiram registration unless, within 30 calendar days of its receipt of the letter, EPA received from Prochimie certain required data or proof of an agreement or offer to cost share with UCB. In its October 4, 2001 response, Prochimie did not provide any of the data/information that the Agency required, but instead requested a re-evaluation of the Agency's determination not to waive certain environmental fate studies, clarification of applicable existing data, and a determination of data requirements applicable to the nonresidential turf use.

To date, Prochimie has failed to take appropriate steps to secure certain data required by the 1991 DCI applicable to nonresidential turf use and remains in noncompliance with those data requirements, which are set forth in Appendix II to this Notice. Accordingly, the Agency is issuing this Notice of Intent to Suspend.

V. What is the Agency's Authority for Taking this Action?

The Agency's authority for taking this action is section 6(f)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 *et seq.*

List of Subjects

Environmental protection.

Dated: February 4, 2003.

Richard Colbert,

Director, Agriculture Division, Office of Compliance, Office of Enforcement and Compliance Assurance.

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

[OPP-2003-0006; FRL-7288-9]

Cymoxanil; Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket ID number OPP-2003-0006, must be received on or before March 31, 2003.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Mary L. Waller, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-9354; e-mail address: waller.mary@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111)
- Animal production (NAICS 112)
- Food manufacturing (NAICS 311)
- Pesticide manufacturing (NAICS 32532)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions in OPP-2003-0006. If you have any questions regarding the applicability of
