Open access AFA vessels	1,309	0.150	970
Total inshore allocation	874,238	100	647,797

¹ According to regulations that will be effective with the final rule to implement major provisions of the AFA at 679.62(e)(1) the individual catch history for each vessel is equal to the vessel's best 2 of 3 years inshore pollock landings from 1995 through 1997 and includes landings to catcher/processors for vessels that made 500 or more mt of landings to catcher/processors from 1995 through 1997.

According to regulations at § 679.20(a)(5)(i)(A)(3), NMFS must subdivide the inshore allocation into allocations for cooperatives and vessels not fishing in a cooperative (*i.e.*, the open access sector). In addition, under § 679.22(a)(7)(vii), NMFS must establish harvest limits inside the SCA and provide a set-aside so that catcher vessels less than or equal to 99 ft (30.2

m) LOA have the opportunity to operate entirely within the SCA during the A season. Accordingly, Table 11 lists the apportionment of the Bering Sea subarea inshore pollock allocation into allocations for vessels fishing in a cooperative and allocations for vessels not participating in a cooperative and establishes a cooperative-sector SCA set-aside for AFA catcher vessels less than

or equal to 99 ft (30.2 m) LOA. The SCA set-aside for sector catcher vessels less than or equal to 99 ft (30.2 m) LOA that are not participating in a cooperative will be established inseason based on actual participation levels and is not included in Table 11. These allocations may be revised based on any corrections to AFA vessels' catch history.

² The SCA harvest limits for vessels less than or equal to 99 ft LOA that are not participating in a cooperative will be established on an inseason basis in accordance with § 679.22(a)(7)(vii)(C)(2) which specifies that "the Regional Administrator will prohibit directed fishing for pollock by vessels catching pollock for processing by the inshore component greater than 99 ft (30.2 m) LOA before reaching the inshore SCA harvest limit during the A season to accommodate fishing by vessels less than or equal to 99 ft (30.2 m) inside the SCA for the duration of the inshore seasonal opening."
