Linux VAR HOWTO

Martin Michlmayr, tbm@cyrius.com, http://www.cyrius.com/tbm v2.32, 12 October 1997

This document contains a listing of service companies which do not manufacture hardware or create packaged software, but add value to existing products. It is maintained by Martin Michlmayr <tbm@cyrius.com>.

Contents

1 About this document

This is the Linux VAR HOWTO. It contains a listing of service companies which do not manufacture hardware or create packaged software, but add value to existing products. This added value can take many forms, such as installation of Linux on computer hardware, configuration, or custom applications. However, at the moment the Linux VAR HOWTO only contains companies selling preconfigured hardware for the purpose of running Linux. Companies offering other services are invited to contact the maintainer Martin Michlmayr at <tbm@cyrius.com> for a listing.

If you contact any companies listed in this document, please mention the Linux VAR HOWTO.

If you need to know more about the Linux Documentation Project or about Linux HOWTO's, feel free to contact the supervisor Greg Hankins <gregh@sunsite.unc.edu>.

Greg Hankins will post the listing to several national and international newsgroups on a monthly basis. In addition, the Linux VAR HOWTO can be found on the World Wide Web at http://var.cyrius.com. New versions of the Linux VAR HOWTO are always placed at this site first, so please be sure to check if the copy you are reading is still up to date!

Companies selling hardware for the purpose of running Linux are invited to fill out the following form and contact me at tbm@cyrius.com. Companies offering other services should contact me so a more appropriate template can be worked out.

Wir bieten komplett konfigurierte Kommunikationsserver ("Lingo") auf der Basis von Red Hat Linux an. Mit Lingo wird neben dem Zugang zum Internet auch die Anbindung mehrerer Standorte und Telearbeitsplätze per ISDN oder Modem realisiert. Lingo organisiert den EMail-Verkehr am Standort, zwischen den Standorten und ins Internet. Außerdem bietet Lingo komplette File-, Print- Voice- und Fax-Serverfunktionalität für alle Clients im LAN und WAN. Mit seinen Online-Funktionen hilft Lingo Kosten sparen (Auswertung der ISDN-Verbindungen, IP-Accounting, Proxy-Dienste, Offline-Surfen im Internet). Zum Schutz vor unberechtigtem Zugriff verfügt Lingo außerdem über mehrere Firewall-Schutzmechanismen und Online-Verschlüsselung.
