Newsletter of the Triangle Woodworkers Association

Meeting Date:
February 17, 2004
The Woodworking Shop
3141 Capital Blvd

February Meeting **Spindle Turning**

Terry Brown, a member of the Triangle Woodturners of NC and professional furniture maker will present a program of spindle turning on the lathe. He will demonstrate the turning and duplicating a table leg. He will also demonstrate the proper use of the tools, safety practices when using the lathe, sanding, and some lathe accessories. In addition to being a fine woodturner, Terry has a broad knowledge of woodworking and cost saving ideas and techniques that apply to woodworking in general. Alan Leland will be the host instead of Dave Mackie who is going to Florida to get warm.

Tuesday, March 18th meeting **Using the Router -- Bob Gabor**

Bob retired from the Electronics Industry in 1990 and almost immediately began the serious pursuit of his nearly lifelong interest in woodworking. He now carries on his woodworking activities in a shop that he built about 4 years ago. He has presented programs for the last several years, obviously enjoys teaching and prepares his programs so that they are interesting for all skill levels. The router is one of the most versatile tools available to the woodworker and the addition of simple jigs can take its usefulness to another level. Bob will show you an economical approach to getting started with a router table setup; (expensive fences and tables are not really required to get good results.) He'll also cover the design, construction and use of jigs for perfect joinery, easy to cut hinge mortises, edge trimming, curve cutting and more. Additionally, he'll show you his fast, simple and foolproof method of building bending/gluing forms for curved pieces. This program will be full of good, practical information for woodworkers of all levels. Door prizes, including a "Bob Gabor" Jig, will be offered. Hosted by Fred Ford. Telephone 469-9575.

Friday, April 23rd meeting. **Furniture Building Chest**

Lon Schleining began his career as a professional woodworker in Southern California in 1978 building staircases. To date he has built several hundred projects including many one-of-a-kind designs. A gifted teacher, he taught woodworking classes at Cerritos College for four years. In 1995 he began to write articles for Fine Woodworking and Fine Home Building magazines. He has more than 50 articles in print and was recently named Contributing Editor for Fine Woodworking. Starting in 1998 he began to travel with the Woodworking Shows, teaching seminars on a wide variety of subjects.

Lon will be the instructor for the Sat. Apr. 24 and Sunday Apr. 25 workshops where he will build a small chest. The final design has not been decided yet but the following is an outline of each day.

Saturday: design considerations, glue up techniques without using a jointer, and some assembly.

Sunday: complete assembly, build and fit a door or lid, complete and ready for finish. This is a rather sketchy description of the weekend work but I hope to have a better definition by the March meeting.

In the surveys that Fred Ford did last year there was a high level of interest expressed in building a chest but I have had no input as to what type of chest is of interest so send me your ideas. The price is \$25 for either day or \$50 dollars for the weekend. Noel Butzke will have a sign up sheet available at the February meeting. Remember that you need to pay when you sign up. Dave Mackie is the host and the workshop will be held in his shop.

Changes To Newsletter Classified Ad **And Article Due Dates**

Over the years, it seems it is always a challenge trying to determine what the due date is for classified ads and contributions to newsletters. Starting in February, all items to be placed in the newsletter are to be submitted by the 1st of the month. Your efforts are appreciated!

About the Triangle Woodworkers Association

The Triangle Woodworkers Association (TWA) is a non-profit educational corporation. The TWA is dedicated to teaching woodworking techniques through seminars, classes, and workshops; participants are required to sign waivers absolving liability for TWA or its designated representatives. The TWA promotes woodworking education and community interest in woodworking and in general sharing a love for wood.

Club Officers and Committee Chairmen

Executive Board

President: Hal Liberty, 919-787-7603 or hal_liberty@hotmail.com
 Vice President: Bob Gabor, 919-542-5951 or rjgwood@mindspring.com
 Secretary: Kay Baker, 919-662-8504, kaybaker@nc.rr.com
 Treasurer: Noel Butzke, (919) 233-2905
 Members at Large: Dick Courtney, Robert Foss, Sig Johnson

Committee Chairman

President's Corner

The first meeting was an excellent start for 2004. Thanks to the program committee for the high quality programs we have planned for this year. I have two subjects that I would like to discuss at the February meeting:

- 1: Should we start having drawings at meetings again?
- 2: Should we expand the use of the web site?

Toys for Tots Program

I am planning on a workshop at a senior citizens center this month. We have about 800 unfinished toys and I thought we could start early. The senior will paint at the first session. After I see what they can do, I will expand the program.

The APO fraternity from NS State is planning to come out on a Saturday afternoon to work on the toys that are ready for sanding.

Treasurer's Report

Balance 12/31/03	\$6,528.15
Income	\$1,539.00
Expenses	\$329.94
Balance 1/31/04	\$7,737.21

Respectfully submitted,
 Noel Butzke, Treasurer

TWA Meeting Minutes Friday, January 16, 2004

The meeting was opened by Hal Liberty, President, at 7:30 at the Woodworking Shop on Capital Blvd.

Visitors were introduced including Camilla Lamb with her Girl Scout cookie sales list.

Dave Mackie announced that he is hosting the workshop in April with Lon Schleining from California. Dave will be out of town in February but Noel Butzke will have a sign up sheet. Lon will do the program for the regular Friday night meeting at the Woodworking Shop, and a workshop will be held Saturday and Sunday in Dave Mackie's shop. We will be building a chest. You can attend Saturday and/or Sunday - \$35.00 for one day \$50.00 for both days.

Rick Cornell announced that he has not changed the format on the email newsletter but that he did change from Microsoft Express to Microsoft Outlook. This caused problems which took many hours of debugging to solve but it has been fixed. He has been working on a membership list to be provided by email that will not divulge email or telephone numbers that members have requested to keep private. Only club officials will have access to a complete list.

Jack Barnes announced that the Caricature Carvers of America carved a display called "The Full Moon Saloon" which is on display at Woodcraft for two weeks. Their Web site is www.cca-carvers.org.

Charlie Main announced that Charles Kirkpatrick in Highpoint is in the process of organizing a new woodworker's club called Triad Woodworkers Assoc. They meet in the new Woodcraft store in Highpoint. Anyone from that area who travels to our meeting might be interested in that club also.

Jeff Leimbarger announced that Kelly Mehler wanted to let us know that he has succeeded in opening his wood working school and is accepting students for this summer. His web site is kellymehler.com.

Bruce Wrenn announced that the Southern Farm Show will be Feb. 3rd, 4th, & 5th. This is a good place to compare bandsaw mills. The Greensboro Show is Feb. 19th & 20th. Bruce will be going on Thursday – give him a call if you're interested in going. The Charlotte show is March 13th, 14th, & 15th. The following weekend is the show in northern Virginia. We could go up Saturday morning and come back late Sunday evening. The choices there would be the woodworking show, the Renwick Museum, or the Air and Space Museum. To register on-line for the Greensboro show

use GSNP or WDN. The web site is www.carolinaswoodexpo.com.

Hal Liberty had hard copies of two emails he received. One was for a professional photographer based in Raleigh who thought some of us may need his services. The other is a request for a custom turned column.

Fred Ford introduced Darryl Keil who came from Brunswick, Maine to speak about veneering. He was very instrumental in bringing vacuum pressing into woodworking. He had numerous slides to show various ways to use veneer in designs with examples of book matching, sequence matching, four way matching, various types of veneer, etc.

The meeting was adjourned at 9:30 p.m.

Submitted by Kay Baker, Secretary

Corrections To 2004 Program Calendar

Please note the following corrections to the TWA Program Calendar:

March meeting date:	March 16th
May meeting date:	May 18th
November meeting date:	November 16th
December meeting date:	December 7th

Program topics remain the same.

We' Moved!

If you have not been to our website in a while, you may wish to change your browser's bookmark to: <http://ibiblio.org/twa/>

Check out the site! It is a great place to catch up on old newsletters and see what the club has been doing.

We are also looking for suggestions to make it even better. Please check it out and forward any suggestions by using the "Email Webmaster" link.

Daffynition: Tablesaw – a large flat metal surface, usually centrally located in a shop, onto which the owner piles stuff. Occasionally used to cut wood – after cleaning off stuff.

In a Vacuum?

After attending Daryl Keil's workshop, did you think that a vacuum bag was a "gotta have it" until you saw the price, then it became "I wish I could afford it"? Cheer up, there are less expensive ways to get into vacuum pressing. First, you will need a vacuum generator. There are three basic types: venturi pumps, piston pumps and rotary vane pumps.

Venturi pumps use expanding air to generate a vacuum. These require a source of compressed air to operate. Your venturi pump must be sized to match the output of your compressor. For a better understanding of how a venturi works, see Shop Notes #40, page 17 or Woodshop Jigs and Fixtures by Sandor Nagyszalanczy, pages 167 and 168. (available in TWA library). Sources: Air-Vac – Engine Company. You will want model number AVR093H. (About \$22.00). Reid Tool Supply Company (www.reidtool.com, 1-800-253-0421) carries SMC Vacuum Ejectors. You will want SMC Model 8530 (about \$24.00). Some come with a built in silencer, if not buy one!

The second class of vacuum generators are piston pumps. They can be either a diaphragm pump or a true piston pump. Diaphragm pumps generally generate about 20 – 25" Hg. This is adequate for woodworking purposes. Most air compressors (oil less or not) can be converted to a vacuum pump if they have a threaded inlet to allow adapting to pipe fittings. You will need an inline filter to protect you pumps valves from trash. I use a Fram #3606. It fits ¼" poly tubing perfectly. An old compressor from a refrigerator can be used for a vacuum pump for a limited time. (The refrigerant furnished the cooling, so it will overheat when used for long periods.) HVAC service techs use a vacuum pump to remove moisture from AC line prior to charging. They need pumps that pump into the micron range. When their pumps get worn they are generally discarded as it costs as much to rebuild as a new one. Check with your HVAC contractor. An old AC compressor from a car can also be used to build a vacuum pump. You will need either a Borg-Warner, Techumsie or York pump. The clutch will need to be welded shut.

Diaphragm & Piston pumps can be bought from Grainger or the Surplus Center (1-800-488-3407). Check pawn shops for HVAC pumps. (Limit yourself to \$100 maximum price.)

The third class of vacuum generators are rotary vane pumps. They can be either belt drive or directly coupled to their electric motor. Rotary vane pumps come both oil-less and oiled. Rotary pumps produce the least amount of noise when running. This is important as you will run your bag for 2 – 8 hours at a time. With proper controls your pump won't have to run continuously - only when the vacuum in your bag drops. Next month – Building your own vacuum bag. Further reading – The Veneering Book by David Shathsquare. Available from Woodcraft, The Woodworking Shop, etc.

Vacuum Bagging isn't limited to veneering. It can be used to laminate multiple layers of plywood or MDF to make router table tops or thick fences for table saw sleds.

Cutting a Dado in Plywood

Setting a stacked dado set to cut a dado for plywood is a pain. Instead of trying to sneak up on your needed width, just assemble your dado set slightly oversize. Then cut a dado in a piece of scrap. Next insert your plywood into the dado and then insert a feeler gauge into the dado next to the plywood to fill the resulting gap. By removing the same amount of shims from your dado set as the thickness of the feeler gauge your dado will be set perfect. For you young people – a feeler gauge is a set of precision metal blades that was used to set the "points" in a distributor on your car. Feeler gauges are available from Sears, Agri-Supply, Autozone, etc. for about \$10. For shims you can use post it notes (0.0004" thick) with holes punched in them or use AOL disks (0.046" thick).

Upcoming Events

By the time you read this, the Southern Farm Show will have come and gone. I hope you got out to see the bandsaw mills in action. If not – next year!

Carolina's Industrial Woodworking Expo – February 19th and 20th. For pre-registration, go to www.carolinaswoodexpo.com. Enter free pass code GSNP. A group will be leaving Bo Jangles on Highway 64 in Apex at 7:30 am to go to Greensboro. Come join us. This show is held regardless of the weather. (I have been in snow before!) We could stop at the Woodworke's Supply in Graham on the return trip.

The Woodworking Show in Charlotte – March 12th, 13th and 14th. We will, again, be leaving from the Bo Jangles in Apex at 7:30 am on Saturday the 13th to go to Charlotte. We will return to Apex and probably have a group meal at ocen Stars Seafood. (Corner of Hwy 55 & US 1). Invite your spouse to come and join us for dinner.

The Woodworking Show in Washington DC – March 20th and 21st. Trip canceled due to underwhelming response.

Please let Bruce Wrenn know if you are going to either event. Phone 919-362-0878.

* * *

It doesn't get cold in the Orient. Sounds absurd doesn't it? It must not get cold in China or Taiwan because most tools from there have cord sets that become rigid when it is below 50°.

Library Tidbits

For those of you who attended Darryl Keil's workshop you might be interested in two of our new books. At the end of the workshop Darryl passed around a sample of inlay work with shading that was very impressive. *Woodworking Techniques* by Fine Woodworking, and *Marquetry & Inlay Handbook* by Zachary Taylor both show the process that Darryl briefly explained of using hot sand to shade the veneer.

Those two books are included in the group that I have just processed and will be ready for circulation at the next meeting. Here is the list so you can see what you might be interested in.

Title	Author	Subject
Handcrafted Cabinetry	Yoder, Robert	Cabinetry
Classic Cabinetry	Woodsmith	Cabinetry
Bookcases, Shelves & Cabinets	Woodsmith	Cabinetry
