**INDEX
OF
UNITED STATES FLEET**

**PREPARED BY
COMMANDER, AIR FORCE, PACIFIC FLEET**

1 DECEMBER 1944

From: Commander Air Force, Pacific Fleet.
To: Air Force, Pacific Fleet.
Subject: Index of United States Fleet.

1. This index is a revision of the one originally compiled to meet an insistent demand from units of Air Force, Pacific Fleet for a manual containing information with respect to our rapidly enlarging fleet. Pilots are often faced with the task of supplying air cover over ships which have recently joined the Pacific Fleet and often it has been difficult to supply the fundamental characteristics of the newer ships. The advent of amphibious operations on a large scale has resulted in the employment of many ships, as well as landing craft, which heretofore have not been encountered in Pacific operations.

2. This information has been compiled from numerous sources, both official and unofficial. In its use several points should be constantly borne in mind:

- (a) Only vessels which regularly bear a name as distinguished from a number are included. Vessels such as PC, SC, LST, LCI, PT, etc., which are designated by number rather than by name are not included, except by type in the index of designations. A table of characteristics of Landing Craft, Ships and Vehicles is included, however.
- (b) Vessels bearing Coastal designations such as AMc or PYc and District Craft are not included, other than in the designations index.
- (c) When a date is found after the name of a vessel, it is, as far as can be ascertained, the date of commissioning or acquisition.
- (d) Certain vessels now building or projected, of a type regularly bearing a name, have been assigned a number but no name as yet. In order to make this index as complete as possible, the numbers assigned to unnamed aircraft carriers, cruisers, destroyers and submarines have been included where available.
- (e) Certain operational data have been included, where available. Although they are approximate and, in some respects, incomplete, they are included to give a general idea of the characteristics of the ships in question.
- (f) Although every effort has been made to make this index as complete as possible, in a constantly changing organization like the U. S. Fleet, it is impossible to be completely up to date.

3. It is hoped that from time to time, as the need becomes apparent, it will be possible to issue further revisions or supplements to this index so that units of Air Force, Pacific Fleet, may be kept as well informed as possible on the status of the fleet.

G. D. MURRAY.
